Dear Hiring manager,

I am a junior Electrical Engineering and Computer Science (EECS) and Applied Math and Statistics major at the University of California, Berkeley. My primary interests and hobbies lie in the juxtaposition of machine learning applications along with applied mathematics, allowing me to explore the vast field of statistical learning and data science.

My primary belief is that I will be a great addition to Adobe because of my familiarity with almost all of Adobe's tools from the Acrobat to Photoshop, EdgeCode and Lightroom. Further, an early introduction to this field has given me a head start of a year and half, hence bolstering my understanding and experience in the machine learning spectrum especially handling large scalable projects from NASA, SFO etc. Further, having taken all the major classes required for this position, I possess a solid foundation on the fundamentals of learning and take a keen interpretation on the mathematical interpretation behind the applications as well. I hope that I can be a valuable contribution to the Adobe team this summer.

Sincerely,

Bharath Satheesh  
UC Berkeley class of 2017
